this review of the techno economic performance of the main global fishing fleets discusses the  
outcomes from 20 country level studies of fishing fleets from africa asia europe north and south  
america it includes financial socio economic and technical information from 103 major semi  
industrial fishing fleet segments which are responsible for an estimated 39 percent of marine  
capture fisheries production worldwide the analysis of vessel characteristics reveals substantial  
differences in fishing capacity in terms of vessel length tonnage and power between fleet segments  
an increase in the gross tonnage of average vessels was observed in fleet segments also covered  
in previous reviews substantial increases in average length overall and engine power were  
observed in several asian fishing fleets the age structure of the fishing fleets in most regions  
except asia shows an upward trend an analysis of the costs and earnings data showed that labour  
and running costs were the two main cost components for the majority of fleet segments ninety two  
percent of 97 fleet segments reported a positive net cash flow in the year they were surveyed in the  
2016 2019 period net profit margins of 10 percent or more were realized by average fishing vessels  
in 73 percent of the fleet segments returns on investment rois of 10 percent or higher were realized  
by 61 percent of the fleet segments the review also discusses developments in fishing technologies  
these developments along with a general increase in seafood prices successful fisheries  
management in some areas and improved fleet capacity management in europe and north america

have all contributed to the ongoing positive financial and economic performance of the main global fishing fleets in recent years

the profusely illustrated yearly military reference that features world fleet reviews significant ship developments and technological advancements ships monthly now in its seventh year this annual has established an international reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months it combines regional surveys with one off major articles on noteworthy new ships and other important developments besides the latest warship projects it also looks at wider issues of importance to navies such as aviation and electronics and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance the 2015 edition looks in detail at the french navy and the bangladesh and myanmar navies while significant ships include the montford point class mobile landing platforms the samuel beckett offshore patrol vessels and the skjold class fast attack craft there are technological reviews dealing with naval aviation by david hobbs and current mine warfare developments by norman friedman while warship recycling is discussed by ian buxton intended to make interesting reading as well as providing authoritative reference there is a strong visual emphasis including specially commissioned drawings and the most up to date photographs and artists impressions for anyone with an interest in contemporary naval affairs whether an enthusiast or a defense professional this annual has become required reading

this book is of the seafarers by the seafarers for the seafarers seafarers are the core of all maritime trade and their expectations perspectives alone should be at the centre of all solutions for maritime skills taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology the issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem status relationship with stakeholders technology focus on renewable energy anxiety levels and so forth furthermore stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry this exhaustive book can be used as a guide for further revisions or a revamp of the current stcw convention the editor thereafter divided the researched critical gaps in maritime skills into four groups jain s model for maritime skills panoptic social intelligence upskilling reskilling for onboard vessels skills and portable skills for future shore jobs panoptic and social skills are core skills required for both on board vessels as well for maritime shore jobs thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps these experts were drawn 1 from countries such as india the philippines romania south

korea malaysia uae the uk and singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers from this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels it managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth the solutions in this book will also resolve the issue of the shortage and retention of seafarers
